

Acoustical Applications:

- Simple Cycle Turbine
- Combined Cycle Turbine
- Cogeneration Systems
- SCR/CO Exhaust Systems
- HRSG/Steam Boiler Systems
- Geo-Thermal

Engineered Components:

Turbine Inlet Systems

- Silencer, Ducting

Turbine Exhaust Systems

- Stacks, Silencers, Lined/Unlined Ducting
- Acoustical Barrier/Shroud Systems
- Vent/Blowdown Silencers

FD/ID Industrial Fans

- Silencers (Tuned-Dissipative/Absorptive)
- Acoustical Enclosures/Shrouds

Industrial Enclosures

- Single/Double-Wall Construction
- Turbines, Blowers, Pumps, Transformers

High-Performance Lagging Systems

- Acoustical/Thermal Performance

Plant Noise Control

- Independent Site Surveys
- Acoustical Consultant Collaboration
- Modeling
- Noise Mitigation Plan

Engineering Design Support

- Acoustical / Thermal
- Structural
- Program Management

Acoustic System Implementation

- Fabrication
- Installation Support
- Validation
